

A message from all in A Building

Move your plants to the side of your patio,

The runoff of your plants is creating algae on the entry side of the walkway leading into our building making it dangerous & slippery,

If you do not comply, an application of ~~weed killer~~, "Roundup" will be put to work!!!!!!!

Letter 1: Delivered to Door
of A24 on 6/15

Letter 2: Posted in Lobby by A24

Date: June 17, 2018

To: Resident of **A BLDG**

From: Apartment **A24**

This letter is in response to the notes taped to my door on the evening of June 14 and June 17, 2019. First of all, all of my plants are located far enough away from the entry way and do not cause the Algae on the walkway. They are ordinary houseplants. The Algae is caused by the falling leaves, branches and samaras seeds (helicopter seeds) that sit in rainwater. The Maple trees also produce SAP, **which is what is actually causing the Algae problem. Warrington Police AGREE.**

I would have thought you would first communicate with Lindy Management before making such a serious threat, obviously you either do not live here or think you can handle this yourself.

I have lived with alongside inconsiderate neighbors that have domestic disputes at all hours of the night, loud music during early morning/late night hours and other disturbances. I have never had the need to leave any form of note at their door. Since it is obvious that you have an issue **COME AND SEE ME, I WELCOME THE CONFRONTATION.**

Please be advised, that I have reported this situation to Lindy Management, Lindy Corporate Office and Warrington Police. Your threat not only risks my personal property but also my health and will not be tolerated.

Roundup is a known Carcinogen (cancer causing agent) and is poisonous to humans and animals.

Warrington Police will be visiting Lindy Management on Tuesday 6/18/19, this is hazardous issue and will hold Lindy Mgmt. accountable.

I extend my apologies to the tenants not involved, it such a shame we live along side of people like this.

Letter 3: Posted in Lobby & A24's
on 6/17 Door

I'm happy to meet you face on.

Lets invite all residents to the back entrance of A Building. Look at all the balcony's & see what what your Algae farm is doing,,,,it is the only one that is dripping algae endangering all residents. Go out & look!!

Also, invite the health inspector & insurance rep to look at our sidewalk

Lindy is doing a great job to maintain this property,, They just spent a fortune to clean all the Patios. Go outside and look at yours!!!

Post this on the lobby window with a time to look at your mess & I'll be there .

Letter 4: Posted in
Lobby on 6/18
& also on A 2nd
floor next to elevator

So you called the Police.

I did meet with Lindy mgt. I have requested the
Officers contact information & will invite him and a
city inspector to meet me in the back parking lot.

And yes, I talk with many that has to look at your
algae dripping of your patio.

Lindy does a great job here. Too bad we have your
eyesore.

I will request the painters do your patio. I'll buy the
paint

And yes I smiled for the camera

6/18/19

Michael,

A43
Letter 5: Dropped at our
office to confirm he
wrote the letter & posted
it in Lobby after being
told not to

Thank you for bringing the situation with "A24" to
my attention along with the reported Police report.

I take these matters very seriously & I am sure you,
the Lindy Team and Ms. Snyder do as well.

Please send me the officer's name and contact
information so I can respond.

Please respond by 6/21 so I can contact or visit the
officer.

My email is smith3442@comcast.net
